My background instruction

Degree in Computer Science from the Federal University of Minas Gerais (UFMG) – End 2022

(Associate's degree, Duration 3 Years) Long-term Computer Technician Course at the Federal University of Viçosa (UFV) - Start 2014 - End 2016

High School 3rd Year at the Federal University of Viçosa (UFV) - (Start 2014 - End 2016)

Objective

Acting as a developer/Full/Senior Engineer in the area of computing, interest in the areas of programming and software development, WEB applications, servers. Great interest and facility to work in teaching areas. Curiosity and a lot of knowledge in the area of exact sciences.

Skills and Knowledge

- Frameworks & Libraries: Laravel, Slim PHP, React, OpenCart, SASS, Less and SCSS.

- Languages: Python, Java, Android (Android Studio), C, C++, VB 6.0, WEB (HTML, CSS), JavaScript, React, JQuery, Ajax, PHP 5, PHP 6, PHP 8, SQL e SQL Server, Git, MVC and API's.

- Operating systems: High level of knowledge in Linux and Windows.

- Ease of learning and teaching.

- Certificates: Lecturer in Android Programming and Android Studio tool use, Anatomy of Digital Marketing, Introduction to Unity 3D programming for Digital Games, Participation and awards in the Brazilian Programming and Mathematics Olympics (awards, including a FAPEMIG grant for development of projects in the Programming Area for Mobile Devices and Arduino Microcontroller), exhibitor and table coordinator and participation in OBI, courses for coordinator and team leader.

- Portuguese and English languages: Writing, reading and speaking.

Professional experience

Company: ForPeople Softwares. Duration: 1 year and 3 months. Full Stack Developer III. I worked with PHP using Laravel, MySQL and React framework in a Linux environment, discussing and planning development strategies for the company's software. I worked in the creation of REST API to feed the company's WEB systems on demand, I worked as a SCRUM MASTER and code reviewer.

Company: Doglee. Duration: 4 years (Current on pause). Data Engineer and Senior Backend Developer. I work with PHP and MySql in a Linux environment, discussing and planning development strategies for the company's software. I work in the creation of REST API to feed the company's WEB systems on demand, using frameworks in PHP. Big Data handling and SQL optimization. Creating and updating documentation and code review. Interconnection and maintenance between APIs. Performance tests and bug fixes.

Company: Imobiliária Vitrini Ltda. Duration: 9 months. Full Stack WEB Developer and Senior API Developer. I worked with the creation of the API and data transport. I worked using SLIM framework to build APIs. Maintenance on Linux/Ubuntu servers. Big Data Treatment. Performance tests and bug fixes. Computer maintenance.

Internship: FAPEMIG – Duration: 150 Hours – Activities aimed at interconnecting the Arduino microcontroller and a system for Android.

Company: TrisTris. Duration: 2 years. Full Stack Web Developer. I worked with PHP, MySql, Javascript and JQuery, HTML, CSS. Worked on creating pages and components for an internal WEB project and an OpenCart-based sales website. Maintenance on Linux/Ubuntu servers. Creation of APIs using frameworks in PHP. Big Data handling and SQL optimization. Creating and updating documentation and code review. Creation of market trend graphs using BigData and chart.js treatment. Interconnection and Maintenance between APIs. Performance tests and bug fixes.

About me

I developed and coordinated several projects with a work team in the last experiences of professionals, I went through several team coordination and Scrum Master courses in my career and also during my graduation at UFMG. Good relationship with teamwork, ease of learning and teaching, good communication in presentations or explanations. Good Portuguese and English.

I really like programming, and I work perfectly using Object Orientation in projects that require high quality code, I have a lot of experience in developing responsive software. It also includes good knowledge in the database area with high SQL knowledge. Ease of configuring Linux servers.

I am interested in working in the field of technology, development and the like, I would like to develop a career in technological hub cities, with great enthusiasm for carrying out group and individual activities, being remote the presence.
